Since 1972, Exotic Automation & Supply has been at the forefront of providing best-in-class motion and control components for manufacturers throughout North America.

Exotic is a premier distributor of automation systems and fluid power products from Parker Hannifin Corporation. This allows our customers to benefit from our unique ability to design and build hydraulic and pneumatic systems.

**ENGINEERED SYSTEMS FROM EXOTIC AUTOMATION & SUPPLY**

- **Engineered Hydraulic Systems**
  - Large, Central Hydraulic Systems
  - Custom Power Units
  - Manifolds
  - Filter Carts
  - Proportional / Servo Control

- **Engineered Pneumatic Systems**
  - Manifolds
  - Air Panels
  - Fluid Control Panels
  - Filtration, Regulation, and Lubrication (FRLs)
  - Custom Valve Packages

- **In-House Engineering & Production**
  - Hose Assembly
  - Automation Build Center
  - System Design & Engineering
  - In-House Painting Capability
  - Full-Service Machining Center
From engineered systems for complex manufacturing centers to portable, compact units for hydraulic and pneumatic applications, Exotic Automation & Supply is a recognized leader in providing custom fluid power solutions.

Exotic’s ability to support customers with turn-key service from initial concept drawings to complete documentation (2D & 3D CAD) at delivery means Exotic is uniquely positioned to solve all of your hydraulic and pneumatic challenges.

DESIGN. BUILD. TEST. DELIVER.

Value-Added Services from Exotic
- Technical, Product Application Support
- System Design & Engineering
- Full Service Build Capabilities
- Assembly, Test and Documentation
- Kitting
- C.A.R.E. Program: Cost Acquisition Reduction by Exotic

A Premier Parker Distributor
- Hydraulic Technology Center (HTC)
- Pneumatic Technology Center (PTC)
- Automation Technology Center (ATC)
- Connector Technology Center (CTC)
- Parker Authorized Power Unit Assembler
Exotic Automation & Supply provides products and services required for all hydraulic needs. From comprehensive design and build solutions to hydraulic hose assemblies, you can trust Exotic’s engineered hydraulic systems to keep your equipment functioning at their highest levels!

**HYDRAULIC POWER UNITS**

From installation on the plant floor to implementation, within mobile equipment and military vehicles, hydraulic power units from Exotic are designed and built to our customer’s exact specifications.

**Configurations:**
- Conventional
- L-Shaped
- Vertical
- Stack Frame

**Custom Features:**
- 3D CAD Design
- Heating
- Cooling
  - Fan Forced Air
  - Plate Styles
- Filtration
  - Pressure
  - Return
  - Off-line (kidney loop)
- Flow Monitoring

Exotic Automation & Supply provides products and services required for all hydraulic needs. From comprehensive design and build solutions to hydraulic hose assemblies, you can trust Exotic’s engineered hydraulic systems to keep your equipment functioning at their highest levels!
HYDRAULIC MANIFOLDS
Exotic’s ability to provide the engineering and assembly of directional & proportional control hydraulic manifolds in-house keeps customer’s cost down while improving overall system performance.

Integrated Manifold Packages Feature:
- Modular Designs
- Standard ISO Valves
- Cartridge Valves
- Hybrid Valves
- Reduced Space & Weight

PROPORTIONAL CONTROL
/ SERVO CONTROL
Exotic specializes in integrating servo valves, proportional valves, electronic controls, sensors and actuators to achieve an overall reduction in part-finish variance.

Proportional / Servo Control Offerings:
- Reproducible Control of Actuator Speed
- Progressive Flow Characteristics for Improved Low-Flow Resolutions
- Available Integrated Control Electronics with Ramp Adjustment
- Complete Solutions Including Manifolds, Valve Drivers, Power Supplies, Cable Assemblies
- Software Enabled Valve Parameter Setup and Maintenance

FILTER CARTS:
Exotic’s filter carts provide a convenient portable mode of off-line filtration, flushing and fluid transfer.

Filter Cart Benefits:
- Narrow Design for Tight Aisles & Passageways
- Two Stage (two-pass) Outlet Filtration Plumbed in Series for Finer Filtering
- Rear Mounted Motor for Better Balance (Fluid Will Not Drip on Motor)
- 2-Inch Drip Tray to Help Prevent Spills and Increase Facility Cleanliness
- Visual Indicators, 3-Band, Both Filters
- Pump Bypass set at 65psi to Prevent Motor Stalling
- Vane Pump, Stainless Steel Wand and Solid Rubber Wheels for Durability
ENGINEERED PNEUMATIC SYSTEMS

Exotic Automation & Supply offers a full complement of pneumatic systems and components to optimize total system performance. Exotic’s Engineers work with you to design and build engineered pneumatic systems focused on enhancing precise function & operations.

FLUID CONTROL PANELS
Exotic designs & builds custom fluid control panels with a focus on optimizing total system performance through the precise control of pneumatic, hydraulic, lubrication and coolant functions.

Fluid Control Panels Provide:
• Compact Design
• Ease of Maintenance
• Efficient, Clean Performance
• Reduced Machine Footprint
• Total Fluid Power Control

PNEUMATIC MANIFOLDS
Exotic pneumatic manifold solutions are designed and configured to be integrated within existing and new manufacturing systems alike, providing unique solutions for pressure, vacuum & leak test applications.

Pneumatic Manifold Packages Feature:
• ISO Standards
• Field Bus Manifolds
• Modular Designs/Light Weight
• Multiple Wiring Configurations
• I/O - Link Connectivity
• Increased Valve Density

AIR PANELS
From drip legs to air prep to field bus manifold assemblies, let Exotic’s experienced system engineers meet with your machine and control design personnel to help “right-size” your pneumatic application with plug-n-play operation.

Air Panels Features
• Custom Manifold Assemblies
• Compact Design for Minimized Machine Footprint
• World Class Air Prep
• All Major Field Bus Interfaces Offered

AIR PREPARATION
Exotic’s custom Filtration-Regulation-Lubrication (FRL) solutions ensure clean, dry air throughout the system, a critical requirement to maintaining fast cycle times, high product quality and reduced downtime.

Custom Features:
• Optimized Air Quality & Performance
• Modular, Light Weight Configurations

Integration with:
- Soft-Start Valves
- Quick Dump Valves
- Lock-Out Valves
- Pressure Switches
SKF & Lincoln are international leaders providing the most comprehensive portfolio of lubrication systems, equipment, tools and related products in the market today with unparalleled levels of customer support available around the world.

CUSTOM SOLUTIONS
SKF Engineered lubrication systems by Exotic Automation include a wide range of custom turnkey solutions for our customers which are designed for the specific and often demanding requirements of the application.

- Industry Standards and Automotive Specifications
- Site Surveys and In-field Technical Support
- Comprehensive and Custom Installations
- Engineered Schematics, Drawings and 3D Models

STANDARD PRODUCTS
SKF & Lincoln standard products are offered wherever professionals demand high quality lubrication and pumping products.

- Automatic Lubrication Systems
- Divider Valves, Injectors & Metering Pistons
- Heavy and Medium Duty Oil & Grease Pumps
- Handheld Dispensing Units
- Assembled and Portable Fluid Handling Equipment
- Tubing and Tube Fittings
