

EXOTIC

AUTOMATION & SUPPLY

Air Handling Solutions for Cultivation Processes

Design • Layout • Install • Supply

An Installed Transair System Will Provide a Significant Cost Savings Over all the Other Traditional Piping Systems.

Transair Aluminum Piping is available with Parker's exclusive "Voice of the Machine"™ Condition Monitoring System with wireless pressure, humidity, temperature & flow remote monitoring sensors. Exotic's Factory Authorized, Certified Installers ensure a 10-Year Leak-Free Warranty and are available 24/7.

- Reduced Energy Cost
- 10 Year Leak Free Warranty
- Tooling Loaner Program
- 80% Labor Savings Over Black Carbon Pipe
- 100% Silicone Free
- Reusable Fittings & Pipe
- Lube & Torque Free Installation
- Reduced System Pressure Drops
- Corrosion Resistant
- Smooth True Bore Design
- 100% Recyclable Pipe & Fittings
- Quick Connect, Reusable & Modular Design

The Most Advanced Air, Inert Gas and Vacuum Aluminum Air Piping System on the Market!

Cultivation Processes Component Solutions

FDA Compliant Fitting

Parker's TrueSeal push-in tube fittings are manufactured from FDA compliant materials and are NSF-51 listed for contact with food.

Ball Valves

Parker supplies a comprehensive line of ball valves that control flow direction and provide shut off, with port configurations that support a diverse range of system requirements.

Nitrogen Generators

Parker nitrogen generators utilize proprietary selective permeation membrane and Pressure Swing Adsorption (PSA) technologies to produce high purity nitrogen from compressed air.

Gas Flow Regulators

Parker's gas flow regulators are plumbed with skinner solenoids. Single & double ported regulators are available.
